

Right Choice

Outdoor LED Area & Site Lighting

Key Features

- Superior outdoor lighting engineered for high performance, reliability, and long-term value.
- Modern, sleek design enhances curb appeal while maintaining night sky compliance.
- Field-selectable CCT provides on-site flexibility to match user preference.
- Ultra-long-life LED technology delivers superior performance with exceptional uniformity and visual comfort.

Electrical

- 120-277VAC or 277-480VAC; 50/60Hz input.
- Class I driver; 0-10V dimming standard.
- 10kV or 20kV surge protection available.
- System power factor >90% and THD ≤20%.
- Operating temperature: -40°C to 50°C (-40°F to 122°F).

Mounting

- Slip fitter, pole mount, 2 3/8" round tenon, and trunnion mounting options available.
- DarkSky Approved only with fixed-position mounting (no adjustability).

Construction

- Die-cast aluminum housing shields critical components from tough environments while maximizing thermal performance.
- Corrosion-resistant powder coat finish for lasting protection. Standard bronze or white, with custom colors available (consult factory).
- IP65-rated enclosure delivers reliable defense against dust, water, and other elements.
- IP65 rated LED light engine prevents dust or moisture from degrading performance.

Optics

- Precision-molded optics: Type II, Type III, Type IV, or Type V distributions. Optional rotatable optics are available (consult factory).
- Industry-leading LEDs with selectable CCT: 3000K, 4000K, and 5000K CCT (min. 80 CRI).
- DarkSky Approved only with 3000K CCT; 4000K/5000K CCT excluded.
- Lumen Maintenance: ≥167,000 Hours (L70) ¹

Warranty

- Backed by US LED's industry-leading Ten-Year Warranty.

Product Performance Summary

Lumen Output	Up to 77,639 lumens
Efficacy	Up to 171 LPW
CRI	≥ 80 CRI
Available CCT	Selectable CCT 3000K, 4000K & 5000K
Warranty	Ten-Year Warranty

Product Overview

The Right Choice Series (RCALR-2) from US LED elevates outdoor lighting with sleek, contemporary styling that blends effortlessly into any outdoor setting. The RCALR-2 utilizes advanced LED technology to offer selectable CCT options in one versatile, ultra-long-life outdoor luminaire. Backed by superior photometric performance, it delivers uniformity and optimal pole spacing to ensure spaces are beautifully lit and exceptionally efficient.

Product Applications

- Auto Dealerships
- Retail Parking Lots
- Educational Facilities
- Business Campuses
- Recreational Areas
- Industrial Facilities
- Security Areas
- Site Pathway Areas

Product Certifications

- UL Certified
- Complies with UL1598 and CSA C22.2
- DLC Premium Listed
- Suitable for Wet Locations (IP65 Rated)
- RoHS Compliant

1. US LED product 'Lifetimes' refer only to the LED light engine, not the power source, and are based on the Illuminating Engineering Society's TM21 Reported Lumen Maintenance methodology at a 25° C / 77° F ambient temperature. The lifetimes are solely meant to be a guide for expected LED degradation and not a warranty or predictive of their actual life, which can be affected by ambient temperatures and other factors.

2. **Wattage Options:** Model 15 (100W/120W/150W), Model 30 (200W/240W/300W), and Model 48 (480W).

Optical Distributions

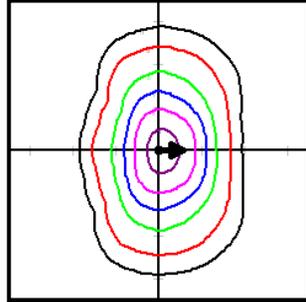

Photometric testing was conducted in accordance with IESNA LM-79 standards by an NVLAP® accredited laboratory. ISO footcandle plots below are examples based on a 25' mounting height and illustrate general distributions. For all specifications, IES files, and detailed photometric data, please visit www.usled.com.

Type II Distribution

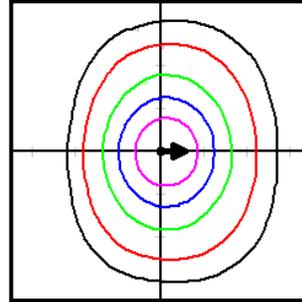

Type II distribution forms a wide, lateral, asymmetric pattern, typically used for applications requiring narrow lighting. Examples include car lot front rows, walkways, side streets, jogging paths, and entrances from the roadway.

Type III Distribution

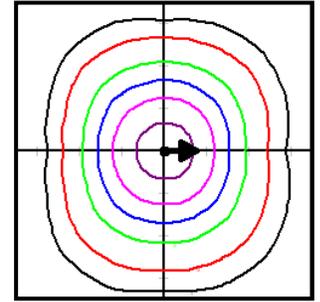

Type III distribution projects light evenly and equally forward on both sides in an "asymmetric" pattern. Commonly used in parking lots, wider roadways, and other applications where a larger area of lighting is required.

Type IV Distribution

Type IV distribution is intended to maximize the amount of light going forward in a longer "semicircular" pattern. It's used around parking lot perimeters where there is no desire for wasted light behind the pole. It's also used for parking areas on the sides of buildings.

Type V Distribution

Type V distribution forms a symmetrical round or square pattern that allows the light to have the same intensity at all angles. Primarily used in parking lot interiors and crossroads. It is also meant for large commercial parking lots where evenly distributed lighting is necessary.

Control Accessories

Standard Grade Locking Type Electronic Photocontrol

Intermatic NIGHTFOX | Model ELC4536

Key Features

- Non-drift silicon light sensor with IR filter
- All components meet 10-year life expectancy
- Exceeds 5,000 ON/OFF switching cycles
- Ideal for single HID and LED fixtures (up to 550 W @ 277 VAC)
- Power-up ON delay (45-60 sec) for easy installation verification and troubleshooting

Sensor Time Delay	Instant On; 2-5 Seconds Off
Photocell Type	Silicon Diode
Photo Control Switch Type	Relay
Activation On	1.5 fc
Activation Off	2.25 fc
