

4 Wire Track System

Installation Instructions

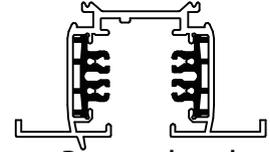

Track system and accessories description

IMPORTANT INFORMATION-Please read carefully before installing the track system !

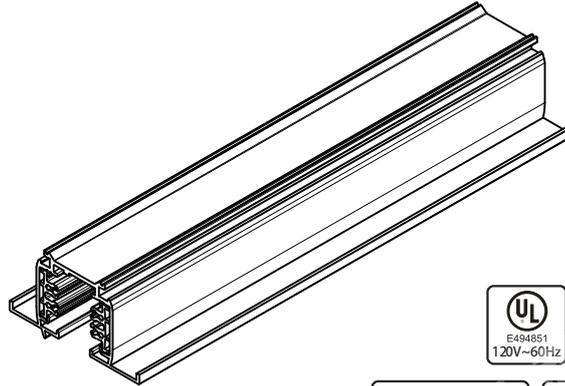

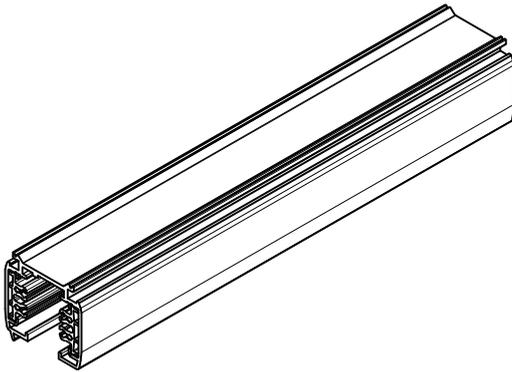

- * FOR indoor use only and in dry and dust-free spaces, system is rated IP20
- * Follow the installation instruction, do not exceed the application scope of the track system
- * Use the accessories only compatible with this track system
- * Shall only be installed by professional authorized installers
- * Use only one power feeding at one point on a system, do not change the internal connections
- * Read this instruction carefully when installation difficulty, do not force installation to cause other problems

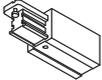

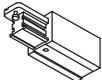

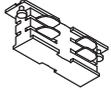

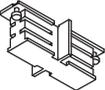

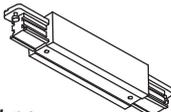

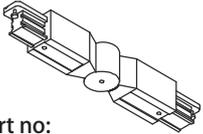

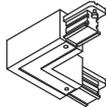

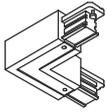

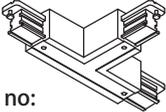

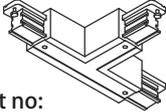

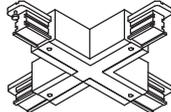

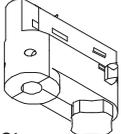

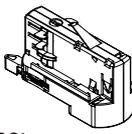

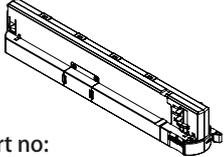

Surface mounted track

Recessed track

 Part no: PRO-04XX-W/B/S XX:20,30,40 W/B/S: white/black/silver	 Part no: PRO-0431L-W/B/S W/B/S: white/black/silver	 Part no: PRO-0431R-W/B/S W/B/S: white/black/silver	 Part no: PRO-0432-W/B/S W/B/S: white/black/silver	 Part no: PRO-0433-W/B/S W/B/S: white/black/silver

4 Wire Track System Installation Instructions

Track installation

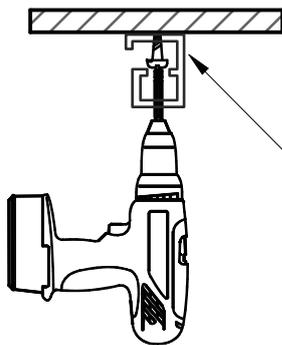

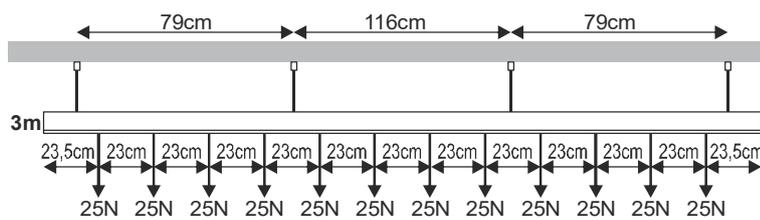

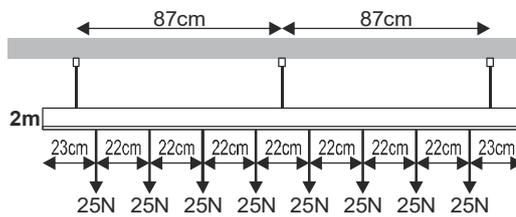

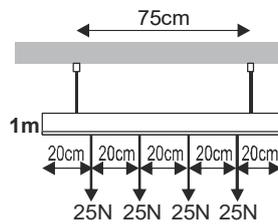

Surface mounted

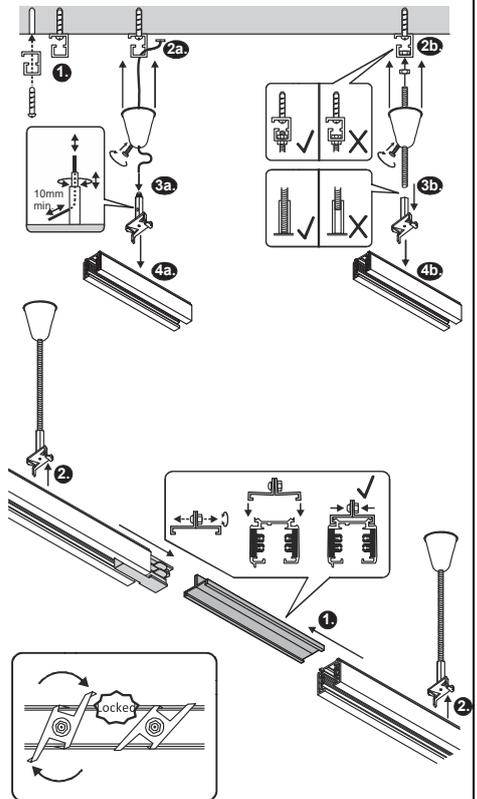

According to the installation condition to confirm screws, or use the material package included on the track provided

Suspended system

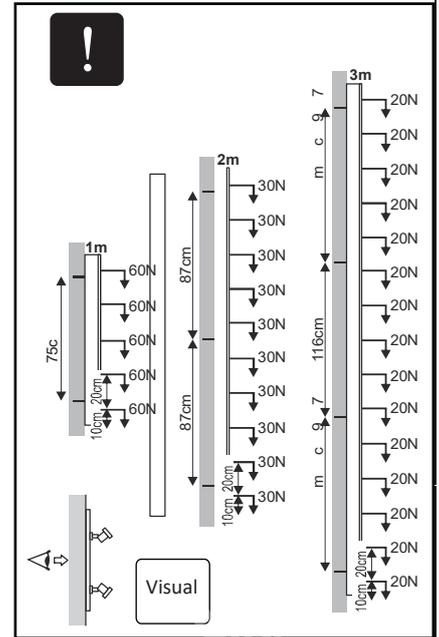

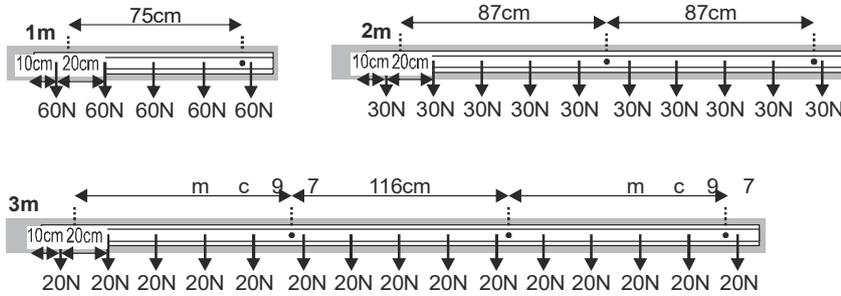

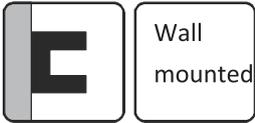

According to the installation condition to confirm screws, or use the material package included on the track

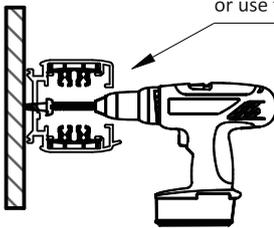

4 Wire Track System Installation Instructions

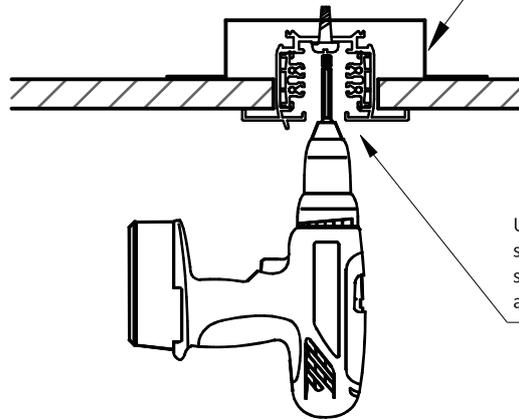

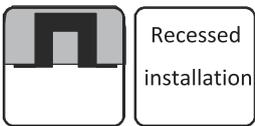

Track installation

According to the installation condition to confirm screws, or use the material package included on the track

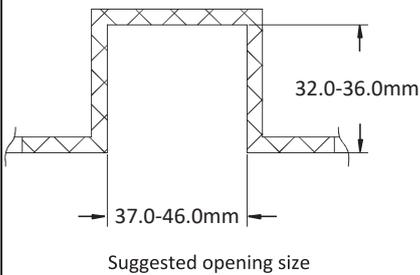

This bracket is not supplied

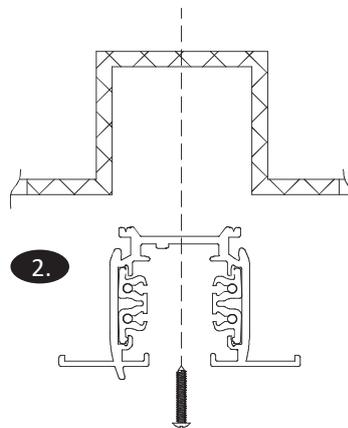

Use drilling screws for metal brackets and metal/wooden screws for softer materials. Dimension the size of the screw to support the load. Use screws in all punched slots and tighten them firmly. Maximum screw head 8mm

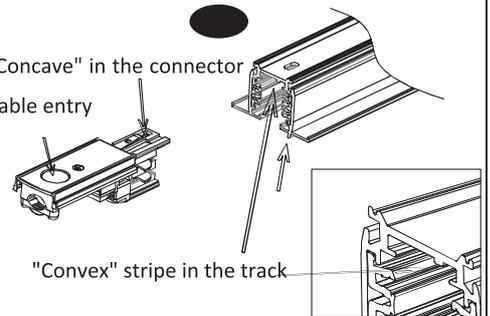

1.

2.

"Concave" in the connector
Cable entry

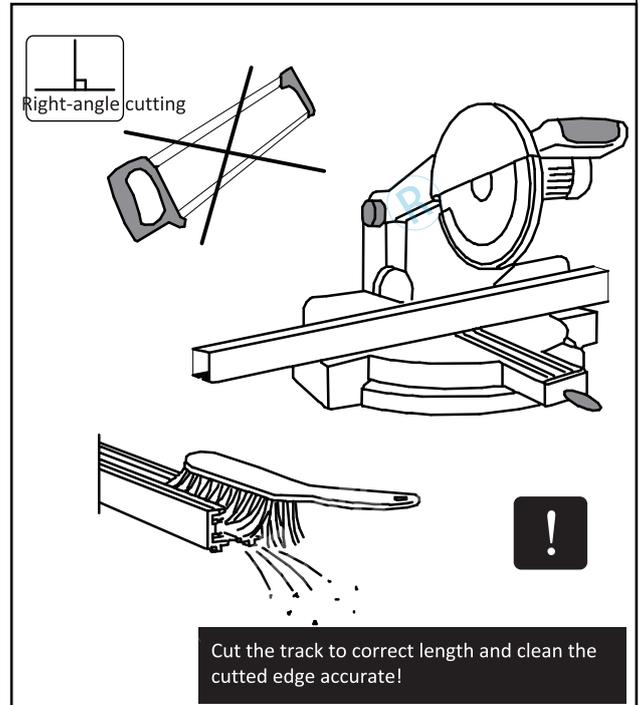

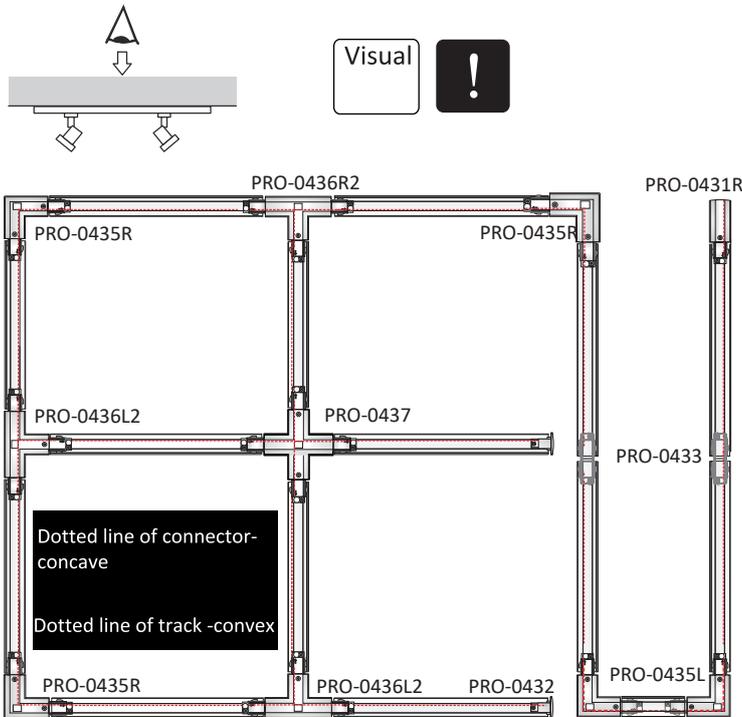

4 Wire Track System Installation Instructions

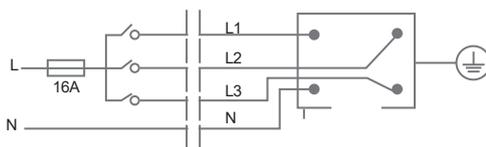

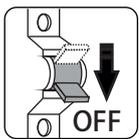

Selection of connector and track cutting

Please select the correct connectors for track system connection

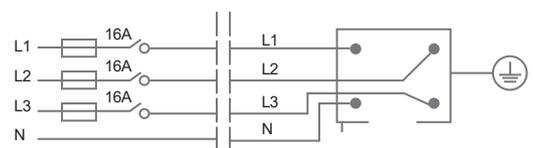

- * Ensure the "concave" is aligned with the "convex" stripe in the track
- * To avoid the damage of connectors and wrong circuit connection, do not force insert the connectors to the track

Indication of power connection

Single-phase electricity 220-250V 16A Max. (EN)

Three-phase electricity 220-250V 3*16A Max. (EN)

Troubleshooting

If the track system is out of power, or the voltage value is abnormal, please check whether the following abnormal conditions exist in the installation:

1. Make sure the "concave" is aligned with the "convex" stripe in the track;
2. Make sure all the "convex" stripe in the track keep same direction;
3. Make sure the connector is pushed into the track by the end;
4. Make sure the feed in box is wired according to the instruction;
5. Make sure the wires are not loosening or falling.

Exceptions

1. It is recommended to use the original track system. Compatibility with other track system is not guaranteed;
2. The product is only suitable for indoor, not outdoor;
3. Do not apply paint or glue to the product.
